

Troy Meeker

Bend, OR | 970-401-0830 | troymeeker1@gmail.com | [LinkedIn](#) | [Github](#)

After 5 + years in Sales and customer service in the outdoor industry, I started to code because I enjoy problem solving, finding solutions and the joy of achieving goals.

TECHNOLOGIES

HTML, CSS, Bootstrap, jQuery, Javascript, React, Python, Ruby, Ruby on Rails, and Heroku

PROJECTS

Save - A - Pet - [Github](#) | [Demo](#)

Pet Adoption application to donate, adopt, and favorite each pet, as well as filter animals by species

- Utilized Internal API to store pet data and receive get, post, and delete requests
- React useState & useEffect hooks to implement state changes and reflect changes to grid item on each render
- Filter through pets and display only selected species using custom fetch request urls

Python Trivia App - [Github](#)

Application with multiple-choice quiz questions capable of asking a question, collecting and judging answers

- Display feedback at end of each question with correct/ incorrect, and percent of total questions answered correctly
- Questions and Answers are both randomized with each load
- Explanations of each correct answer are presented if questions are answered incorrectly

Old North Acres - [Github](#) | [Demo](#)

Review based application for users to write reviews and rate different lodging options

- Created user authentication to confirm if the current user is the creator of the review or has admin status to give permission to edit or delete an individual review
- Built star rating system using radio buttons and React useState hook for users to initially rate and later change a star rating and review on a scale of 1-5
- Implemented EmailJS for site users to easily submit a contact form via email

EXPERIENCE

G5 / RealPage

Bend, OR

Website Implementation Specialist

October 2022 - Present

- Worked closely with Project Managers and Senior Website Implementation Specialists in order to deliver new client websites in a timely manner.
- Responsible for reviewing, editing, and updating content on websites - following our best practices and QC recommendations
- Built websites in our Content Management System by implementing copy and photos and updating various features, including SEO, to make a fast and conversion-optimized website for clients

Bend Electric Bikes

Lake Oswego, OR
