Troy Meeker

Bend, OR | 970-401-0830 | troymeeker1@gmail.com | [LinkedIn](#) | [Github](#)

After 5+ years in Sales and customer service, I started to code because I enjoy solving difficult problems, challenging myself, and learning how to work with new technology. My experiences have taught me to be adaptable, learn quickly and grow from mistakes. When I'm not coding or learning, I'll be running, or adventuring around the PNW with my family and dog.

TECHNOLOGIES

HTML, CSS, Javascript, React, Python, Ruby, Ruby on Rails, Active Record, JSON, Heroku, and Postman

PROJECTS

Save - A - Pet - [Github](#) | [Demo](#)
Pet Adoption application to donate, adopt, and favorite each pet, as well as filter animals by species
- Utilized Internal API to store pet data and receive get, post, and delete requests
- React useState & useEffect hooks used to implement basic state changes and display information on each render
- Filter through pets and render only selected species using custom fetch request urls

MyList- [Github](#) | [Demo](#)
Craigslist Style application to list items for sale, favorite items, and edit/ delete items
- Implemented Login & Signup functionality and save session cookies if user is logged in
- Filter functionality to show items listed by either ascending price or alphabetical order
- Applied full CRUD capabilities on item model

Old North Acres - [Github](#) | [Demo](#)
Review based application for users to write reviews and rate different lodging options
- Created user authentication to confirm if the current user is the creator of the review or has admin status to give permission to edit or delete an individual review
- Built star rating system using radio buttons and React useState hook for users to initially rate and later change a star rating and review on a scale of 1-5
- Implemented EmailJS for site users to easily submit a contact form via email
